Club Vision

The McMaster Rehabilitation Club **aims to help students explore careers in rehabilitation** by building a supportive community and connecting them with mentors, professionals, and hands-on experiences.

We strive to bridge the gap between students and the rehab field through interactive events, networking, and opportunities for learning and growth.

MRC CASPER PREP MASTER DOCUMENT

Disclaimer #1:
Nothing in this document is confidential information and no content from the real Acuity Insights Casper Test.

Disclaimer #2:
The tips and advice outline are recommendations for how to approach the Casper Exam – not the rule of law. These strategies are intended to support your learning and preparation for the Exam, and may be adjustable from person to person.

What is the Casper Test

The CASPer test is a situational judgment test used in admissions for medical, dental, veterinary, and various rehab professions. Unlike traditional knowledge-based standardized exams, CASPer is designed to assess a candidate's social intelligence, professionalism, ethical reasoning, empathy, and other non-academic attributes that are critical for real-world professional success

New Casper Format for 2025/2026 Cycle

The test has recently been **shortened to approximately 65–85 minutes** (previously 90–110 minutes), now featuring **11 total scenarios (shortened from 14 scenarios)**: 4 scenarios in the video response section and 7 in the typed response section.
